

Technology Stack

Date	07 July 2026
Team ID	SWTID-2026-2168
Project Name	EduGenie: Google Gemini-Powered Learning Assistant
Maximum Marks	2 Marks

Define Your Technology Stack:

Identify the programming languages, frameworks, databases, front-end tools, back-end tools, and APIs that you will use to build your solution. A well-chosen technology stack ensures that your application is scalable, maintainable, and aligned with your project requirements.

Fill out the table below to detail the specific technologies chosen for each component of your architecture and provide a brief justification for your choice.

Technology Stack Details

S.No	Architecture Component / Layer	Technology Chosen	Justification / Purpose
1	Frontend / Client-Side	HTML5, Tailwind CSS, JavaScript, Marked.js	Creates a responsive and interactive user interface with Markdown rendering support.

2	Backend / Server-Side	Python, FastAPI, Unicorn	Provides fast API processing and efficient backend services.
3	Database / Data Storage	No Database (Runtime Data)	The application processes requests in real time and does not store user data permanently.
4	Cloud / Hosting / Deployment	Localhost (Development)	Used for local development, testing, and debugging.
5	Version Control & CI/CD	Git, GitHub	Manages source code and supports version control and collaboration.
6	Third-Party APIs / Other Tools	Google Gemini API	Generates AI-powered summaries, quizzes, flashcards, explanations, and study plans.
