Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • I need clear, step-by-step solutions. • Visual diagrams help me understand faster	THINKS • If I don't get conceptual clarity, I'll struggle in exams • Mnemonics and shortcut tricks save me time • I want bilingual notes (Hindi-English) to revise better.
DOES • Practices exam questions daily with structured solutions. • Builds flowcharts, comparison tables, and summary sheets. • Searches for Hindi-dubbed content for relaxation after study.	FEELS • Confident when concepts are explained with visuals. • Stressed when forced into rote learning. • Motivated by story-based revision and real-world analogies.
