

Project Initialization and Planning Phase

Date	07 July 2026
Team ID	SWTID-2026-2168
Project Title	EduGenie: Google Gemini-Powered Learning Assistant
Maximum Marks	5 Marks
Project Overview	
Objective	The primary objective of EduGenie is to provide an AI-powered learning platform that helps students learn faster through instant explanations, summaries, quizzes, flashcards, and personalized study assistance.
Scope	The project focuses on improving the learning experience by integrating Google Gemini AI to provide intelligent educational assistance for students, teachers, and self-learners through a web-based application.
Problem Statement	
Description	Students often struggle to understand complex topics, prepare effective notes, and revise efficiently due to scattered learning resources and limited personalized guidance.
Impact	Addressing these challenges improves learning efficiency, saves study time, enhances concept understanding, and supports better academic performance.
Proposed Solution	
Approach	EduGenie integrates Google Gemini AI with a web application to provide intelligent learning assistance. Users can ask questions, generate summaries, create quizzes, flashcards, and study roadmaps instantly.
Key Features	AI Chat, Topic Explanation, Notes Summarization, Flashcard Generation, Quiz Generation, Study Roadmap, and Study Timetable.

Resource Requirements

Resource Type	Description	Specification
Hardware		
Computing Resources	CPU	Dual-Core or Higher
Memory	RAM	8 GB
Storage	Disk space	10 GB Free Space
Software		
Frameworks	Backend Framework	FastAPI
Libraries	Python Libraries	google-generativeai, FastAPI, Uvicorn, python-dotenv
Development Environment	IDE	Visual Studio Code
Data		
Data	Source	User Queries, AI-generated responses (Google Gemini API)
