

Project Executable Files

Date	07 July 2026
Team ID	SWTID-2026-2168
Project Name	EduGenie: Google Gemini-Powered Learning Assistant
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes/No/NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	NA
5	Environment configuration file (.env.example or similar)	No
6	Deployed application URL (if hosted)	No
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	No
9	Test files and test results	No
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

/EduGenie

/backend - Backend source code

/frontend - Frontend source code

/models - Gemini AI model

/modules - AI feature modules

main.py - Application entry point

requirements.txt - Python dependencies

index.html - Main user interface

script.js - Frontend logic

README.md - Setup and run guide

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	Not Deployed
Login Credentials (Demo)	Not Required
Platform / Hosting Provider	Localhost
Repository Link	https://github.com/Harishsharma0710/EduGenie-Google-Gemini-Powered-Learning-Assistant/tree/main
Demo Video Link	

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

Pre-requisites

Python 3.10 or above

Git

Visual Studio Code

Internet Connection

Google Gemini API Key

Steps

Step 1: Clone the repository.

Step 2: Navigate to the backend folder.

Step 3: Install dependencies:
`pip install -r requirements.txt`

Step 4: Configure your Gemini API Key.

Step 5: Start the backend:
`python main.py`

Step 6: Open frontend/index.html in your browser.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Internet connection required	Connect to the internet
2	Depends on Google Gemini API	Retry if API is unavailable
3	User authentication not implemented	Planned for future enhancement
